SUMMARY

Data Analyst with **4+ years** of experience leveraging **SQL, Python, Tableau, and statistical analysis** to build metrics, dashboards, and data pipelines that monitor performance, detect anomalies, and drive business decisions. Currently pursuing an **M.S. in Data Analytics (May 2026)** with hands-on experience in **analytics, experimentation, and reporting**.

EDUCATION

Clark University

Master of Science in Data Analytics

Worcester, MA

Aug. 2024 – May 2026

Pune Vidyarthi Griha's College of Computer Science

Master of Science in Computer Science

Pune, India

Jun. 2018 – Apr 2020

TECHNICAL SKILLS

Programming: SQL (Advanced), Python(Pandas, NumPy), Jupyter Notebook, UNIX

Data Engineering & Analytics: ETL Pipelines, Data Modeling, Data Automation, Data Quality & Validation, SQL Transformations, Product Analytics, KPI Definition, Statistical Analysis, Trend & Variance Analysis.

Data Platforms: Databricks, Spark, AWS, Informatica, Oracle, SQL Server, Datawarehouses, Git, Bitbucket, CI/CD

BI & Reporting: Tableau, Power BI, Executive Dashboards, KPI Reporting, Data Storytelling.

EXPERIENCE

Amdocs - Software Engineer, Pune, India

May. 2021 – Aug. 2023

- Designed, implemented, and maintained **Python- and SQL-based data pipelines** processing **10M+ records daily**, enabling real-time monitoring of operational and experience-driven metrics.
- Defined and tracked **key performance indicators (KPIs)** across operational risk, quality, and service workflows, supporting short- and long-term business goals.
- Performed **deep-dive analyses on metric fluctuations**, identifying root causes behind anomalies, regressions, and experience gaps.
- Developed **executive dashboards in Tableau and Power BI**, translating complex datasets into actionable insights and reducing manual reporting by **25%**.
- Automated ETL, validation, and monitoring workflows, **reducing manual reporting effort by 25%** and improving response time to emerging issues.
- Collaborated with cross-functional teams to **translate functional requirements into technical solutions**, participating in design reviews and stakeholder walkthroughs.

Accenture - Associate Software Engineer, Pune, India

Nov. 2018 – May 2021

- Designed and deployed **end-to-end ETL pipelines** using SQL, Python, and Informatica, integrating data from **100+ source systems** with 99%+ accuracy.
- Supported governance and reporting initiatives by performing **data quality checks, transformation validation, and reconciliation** across ingestion layers.
- Applied **EDA and variance analysis** to identify trends, inconsistencies, and root causes in operational data.
- Automated recurring reporting and validation workflows, improving data freshness and reducing manual effort by **30%**.
- Documented **system logic, data flows, and operational processes** to support audits, maintenance, and cross-team collaboration.
- Awarded **"Best System Expert"** for analytics rigor, reliability, and stakeholder collaboration

PROJECTS

Electric Vehicle Trends & Forecasting (Python, SQL) – [Github](#)

- Built regression models achieving **87% R²**, supporting forecasting and scenario analysis

Esports Performance Dashboard (Tableau) – [Github](#)

- Tableau dashboard analyzing **\$1.89B** in esports earnings across **165K+ professional players**
